www.makesteamclear.com is a free project, supported by Eason Zhang, to make videos about STEAM in a more approachable and different way. If you found the contents in this post or the site or the youtube channel helpful, please consider support me, thanks

Contents

Chapter 3 of the TikZ tutorial gives an example of Petri net. In this post, let me work through the code line by line. During this example, more tikz libraries are used, such as `arrows` , `decorations.pathmorphing` , `backgrounds` , `positioning` , `fit`, `petri` . These libraries should be added before the `tikzpicture` environment.
